

Java

```
class Solution {  
    public int[] findThePrefixCommonArray(int[] A, int[] B) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} A  
 * @param {number[]} B  
 * @return {number[]}  
 */  
var findThePrefixCommonArray = function(A, B) {  
  
};
```

TypeScript

```
function findThePrefixCommonArray(A: number[], B: number[]): number[] {  
  
};
```

C++

```
class Solution {
```

```
public:
    vector<int> findThePrefixCommonArray(vector<int>& A, vector<int>& B) {

    }
};
```

C#

```
public class Solution {
    public int[] FindThePrefixCommonArray(int[] A, int[] B) {

    }
}
```

Kotlin

```
class Solution {
    fun findThePrefixCommonArray(A: IntArray, B: IntArray): IntArray {

    }
}
```

Go

```
func findThePrefixCommonArray(A []int, B []int) []int {

}
```
